Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

2. Claim 4 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 19 of copending Application No. 10/763,200.

Although the conflicting claims are not identical, they are not patentably distinct from each other because

Regarding claim 4, see lines 1-19 (see claim 15, lines 1-19 of the copending Application No. 10/763,200).

For claim 4, Applicant merely broadens the scope of claim 15 of the copending Application No. 10/763,200 by replacing the terms “a interface” with “a key pad”; “a controller insert a predetermined symbol and range of information into IP address” with “a controller configured to replace the input extension number with a predetermined number, to set the predefined number as a first host address”; and “the range of information indicating a range of telephone apparatuses of the call destination...the call destination is unavailable” with “the call destination is unavailable increments the predetermined number, sets the incremented number as a second host address...without a user intervention at the Internet telephone apparatus”.

It has been held that adding a functional limitation is an obvious expedient if the remaining elements perform the same function as before. Therefore, omission of a reference element whose function is not needed would be obvious to one skilled in the art.

Allowable subject matter

3. Claims 1-3, and 7-12 are allowed.
4. Claims 5-6 would be allowable if claim 4 were to overcome the double patenting rejection(s), set forth in this Office action.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Munter et al.(US 6,243,720); Matsumoto et al.(US 2001/0026545); Baratz et al.(US 5,742,596) are cited to show Internet telephone and communicating method, which is considered pertinent to the claimed invention.
